Overall Morningstar Ranking (Class I)

★★★★★

RAIIX received a 4-Star Overall Rating out of 108 Foreign Small/Mid Growth funds. The Rating is based on risk-adjusted returns derived from a weighted average of the Fund's 3-, 5- and 10-year Morningstar metrics.

See next page for additional details.

Investment Objective

To provide investors with long-term capital appreciation by investing primarily in the common stock of small- to mid-capitalization companies located outside the U.S.

Investment Strategy

The Series is primarily invested in the common stock of small- and mid-capitalization companies traded outside the U.S. Rainier typically selects investments that fall within the market capitalization range of the MSCI ACWI ex USA Small Cap Index at the time of purchase. The Team will invest in any type of company whether it is in the index or not, as long as it is within the market cap range and fits the investment objectives. To control risk, extreme overweighting or underweighting of the Series relative to the Index is normally avoided.

Investment decisions are based on fundamental analysis, which emphasizes bottom-up stock selection of companies that exhibit strong growth, clear key earnings drivers and attractive valuations. The investment team evaluates companies across all sectors and regions using this growth and valuation criteria.

Fund Information

	Ticker	Cusip	Inception	Minimum Investment	Gross Expenses	Net Expenses
Class Z	RAIRX	56382R662	08/21/2017	\$1,000,000	1.06%	1.01%
Class I	RAIIX	56382R688	03/28/2012	\$1,000,000	1.15%	1.15%
Class S	RISAX	56382R670	11/30/2012	\$2,000	1.42%	1.41%

Minimum investment for Class S, the minimum may be waived for certain qualified retirement plans, participants in an automatic investment program, and discretionary investment accounts of the advisor. For Class Z and Class I, the minimum may be waived for certain qualified retirement plans and discretionary investment accounts of the Advisor. Net expenses reflect the Advisor's contractual agreement to limit its fees and reimburse certain expenses. The contractual waiver may not be amended or terminated without the prior approval of the Fund's Board of Directors. Class S includes a 12b-1 fee of 0.25%, of which up to 0.25% is available as a shareholder servicing fee. Class Z shares do not make payments to financial intermediaries.

Trailing Performance

	QTR	YTD	1Y	3Y	5Y	10Y	Inception (03/28/2012)
Class Z	0.81%	0.81%	26.45%	9.23%	1.82%	8.03%	9.87%
Class I	0.78%	0.78%	26.24%	9.06%	1.68%	7.90%	9.77%
Class S	0.72%	0.72%	25.91%	8.79%	1.42%	7.62%	9.50%
ACWIxUS Small Cap	-0.48%	-0.48%	27.82%	13.67%	5.66%	8.01%	7.17%

Performance data quoted represents past performance and does not guarantee future results. Performance for periods greater than one year is annualized. The investment return and principal value of an investment will fluctuate, so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than that quoted; investors can obtain the most recent month-end performance at www.manning-napier.com or by calling (800) 466-3863.

The Rainier International Discovery Fund (Predecessor Fund), which was managed by Rainier Investment Management, LLC, was reorganized into the Manning & Napier Fund, Inc. Rainier International Discovery Series on 08/21/2017. For periods prior to 08/21/2017, performance for the Class I and Z Shares is based on the historical performance of the Predecessor Fund's Institutional Shares, and will differ to the extent that the Predecessor Fund's Institutional Shares had a higher expense ratio. For periods between 11/30/2012 and 08/21/2017, performance for Class S is based on the historical performance of the Predecessor Fund's Class A Shares; performance prior to 11/30/2012 is based on the historical performance of the Predecessor Fund's Institutional Shares and adjusted for the Predecessor Fund's Class A Shares expenses. If the sales charges were reflected or if performance had been adjusted to reflect the Class S Shares' expenses, the performance would have been different depending on total expenses incurred by the Predecessor Fund.

A Word About Risk

All investments involve risks, including possible loss of principal. As with any stock fund, the value of your investment will fluctuate in response to stock market movements. Small- and medium-capitalization companies tend to have limited liquidity and greater price volatility than large-capitalization companies. Funds whose investments are concentrated in foreign and emerging market countries may be subject to fluctuating currency values, different accounting standards, and economic and political instability. The value of the Series may be affected by changes in exchange rates between foreign currencies and the U.S. dollar. Investments in emerging markets may be more volatile than investments in more developed markets. Additionally, the Series is subject to portfolio turnover risk as it may buy and sell investments frequently, which may result in higher expenses and an increase in realized capital gains and potential tax implications for shareholders.

Fund Commentary

Market leadership shifted quickly during the quarter as new risks moved to the forefront. Early signs of broader participation faded in February as investor concerns around AI disruption spread beyond software into other information and workflow intensive industries, including certain financials. In March, the war with Iran and the related oil shock added renewed geopolitical and inflation concerns. International stocks held up better than their U.S. counterparts in this environment, but results were nonetheless mixed at best.

The strategy delivered slightly positive absolute returns for the quarter and outperformed its benchmark, the MSCI ACWI ex USA Small Cap Index. While outperformance was marginal, it was driven primarily by sector positioning, especially an underweight to the Real Estate sector, along with an overweight allocation to Canada.

Positive contributors to performance included ASPEED Technology (the global leader in baseboard chipsets), Sojitz (a Japanese multi-functional trading company), and Gaztransport & Technology (a French naval engineering company). ASPEED, a top contributor for the second quarter in a row, has benefited from the continued strong AI-related demand for its products. Meanwhile, Sojitz has continued to streamline its business with a laser focus on value creation amid a shareholder-friendly regime change for Japanese corporations, and Gaztransport likely benefited to a degree from the geopolitical environment but the business's fundamental improvement continues to track as well.

Conversely, negative contributors included Auto1 Group (Europe's leading digital automotive platform), Definity Financial (large Canadian property & casual insurance conglomerate), and Lemon Tree Hotels (an Indian hotel chain). Auto1 got caught up in the AI disruption panic during the quarter as a web platform-based business, Definity has faced some near-term challenges with integrating a recent large acquisition, and Lemon Tree has faced headwinds from renovation costs along with a general souring toward the Indian market recently.

Several new positions were added during the quarter, including a reinitiation of a position in Nabtesco (a Japanese automation technology company), CES Energy (a leader provider of chemicals critical to the oil drilling process), and Finning (the Caterpillar franchise owner in multiple regions of the world). Conversely, several names removed from the portfolio included three notable software/platform-based companies with uncertain trajectories in Sopra Steria (France), Cellebrite (Israel), and CarTrade Technology (India).

The portfolio has maintained focus on Developed Europe, including overweight exposures to Denmark, the Netherlands, Sweden, and the United Kingdom. Japan has continued to present more exciting opportunities and remains the portfolio's largest absolute country exposure, while Canada is another area of overweight exposure, especially within Industrials and Materials. The portfolio's exposure to emerging markets continues to be underweight, though we continue to find select opportunities, notably in South Korea and Taiwan.

Non-U.S. stocks - especially of the small- and mid-capitalization variety - continue to appear broadly attractive from a bottom-up perspective in terms of both fundamentals and valuations. Given the valuation dispersion that remains between U.S. and foreign stocks and potential for economic tailwinds in many areas, investing outside the U.S. presents an exciting opportunity, especially for companies with long-term growth tailwinds.

Definitions

Alpha: A measure of an investment's performance relative to a benchmark index. It represents the excess return of an investment compared to the return of the benchmark.

Beta: A measure of an investment's volatility relative to the overall market.

Standard Deviation: A statistical measure of the dispersion of returns for a given investment. It quantifies the amount of variation or volatility from the average return.

Sharpe Ratio: A measure of risk-adjusted return, calculated by subtracting the risk-free rate from the investment's return and then dividing by its standard deviation.

Market Capture: Up market capture is the % of market return captured by the investment manager's return relative to the benchmark during positive periods while down market capture is the % of market return captured by the investment manager's return relative to the benchmark during negative periods.

Manning & Napier Fund, Inc. Rainier International Discovery Fund Series I was rated against Foreign Small/Mid Growth funds and had a 3 star rating for the three year, a 3 star rating for the five year, a 4 star rating for the ten year, and a 4 star rating overall, as of 03/31/2026, out of 108, 97, 83, and 108 funds respectively. Ratings for other share classes may differ. The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. The Overall Morningstar Rating™ for a managed product is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating™ metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.
